

ANCHOR CHART · GRADE 4 · 4.G.A.3

Lines of Symmetry

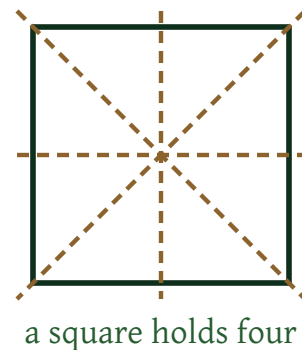

Fold along the line. If the two parts land on each other, the line is one.

1 Fold It. The Parts Must Match.

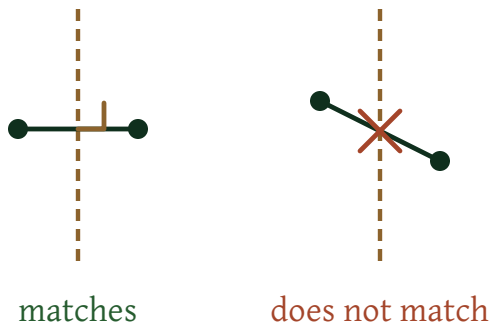

A line of symmetry folds the figure onto itself.

2 Count Every Direction

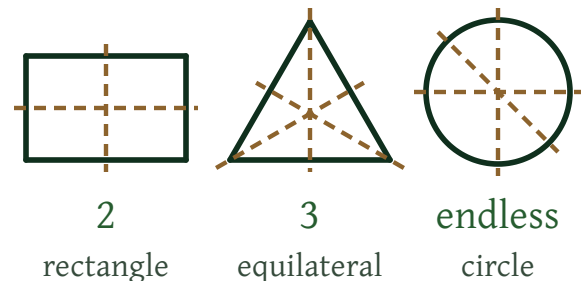

Two folds run across. Two run corner to corner.

3 Same Distance Is Not Enough

Both points sit the same distance from the line.
The join must cross it at a square corner.

4 How Many Each Figure Holds

Count every direction before you write a number.
